Satya Kotipalli

📱 704-453-8005 — ✉️ satyasivasaik@gmail.com — Linkedin Profile

Summary — Software Engineer with 5+ years of experience building scalable React and TypeScript applications across web and mobile platforms. Experienced in component-driven development, accessibility, testing, performance optimization, and secure authentication integrations. Proven track record delivering enterprise applications, modernizing frontend architectures, and collaborating across cross-functional teams within Agile environments.

Skills

Core Frontend:	React.js, TypeScript/Javascript (ES6+), React Native, Expo, HTML5/CSS3, Web Accessibility (WCAG)
Styling & UI:	Material-UI (MUI), Styled-Components, Chakra UI, Responsive Design.
State Management:	Redux Toolkit, Zustand, Context API
API & Data:	RESTful APIs, GraphQL (Apollo Client)
Software Engineering:	Agile Methodologies (SAFe), SDLC, CI/CD, System Design, AI-Assisted Development (Copilot, Claude), Code Reviews, Performance Optimization, AWS CDK, AWS S3
Testing & Tooling:	Vite, Webpack, New Relic, Vitest, Jest, React Testing Library, Playwright, GitLab CI/CD

Experience

Spectrum Reach **Aug 2023 – Present**

Software Developer

- Implemented enterprise authentication and authorization integrations by migrating applications from Keycloak to ESSO-based SSO solutions across multiple applications, standardizing secure access management and user authentication flows.
- Developed the FCC Document Manager UI using React, TypeScript, Redux Toolkit, and Material-UI, supporting FCC document uploads, affiliate management, and secure access workflows.
- Accelerated development speeds by 40% through migration to Vite, optimizing bundling, lazy loading, caching, and Core Web Vitals.
- Built frontend cloud infrastructure using AWS CDK, deploying applications to Amazon S3 with custom domains and automated deployment workflows.
- Monitored application health using New Relic and investigated production performance issues.
- Authored automated testing solutions using Vitest, React Testing Library, and Playwright, including end-to-end coverage for OAuth/ESSO MFA authentication flows, while leveraging GitHub Copilot and Claude to accelerate development and testing workflows.

Tabner **Jan 2023 – Aug 2023**

Software Developer

- Developed internal business applications using React and TypeScript, delivering scalable user interfaces that improved operational visibility and workflow efficiency across teams.
- Implemented robust client-side state management using Redux Toolkit to govern complex, multi-user event configurations.
- Built responsive, accessible single-page application features using React, TypeScript, and Chakra UI complying with WCAG standards.

DigitalDots **Apr 2022 – Oct 2022**

Software Developer

- Developed and maintained React-based internal business applications, delivering responsive user interfaces and ensuring reliable performance across modern browsers.
- Collaborated closely with designers and backend teams to translate Figma designs into responsive, production-ready React interfaces.

Aucupia Online Services **Jan 2021 – Feb 2022**

Frontend Developer

- Spearheaded end-to-end engineering for a cross-platform mobile application utilizing React Native, Expo, and React.js within a rapid-growth, continuous delivery (CI/CD) startup environment.
- Integrated Firebase Authentication into React and React Native applications, enabling Google Sign-In and traditional authentication workflows while managing secure user session handling.
- Defined core frontend architecture and built a reusable design system and component library using styled-components, enabling consistent UI patterns and accelerating feature delivery across web and mobile applications.

Education

Lovely Professional University **Aug 2016 – Sep 2020**

Bachelor of Technology in Computer science and Engineering
